

STUDENTS OF GGIS VISITED TFRI MANDLA

On 12th April 2016 students of Gyan Ganga International School Visited TFRI Mandla Road under an excursion programme . The group of 150 students along with their teachers witnessed this institute and enhanced their knowledge regarding forest and forestry. This group of 150 students was divided into three sub groups and was given this incredible opportunity to get aware and awaken about the importance of forest and its conservation. The main aim of organizing this educational trip was to make the future generation aware about the present conditions of our forest and forest reserves. They were also made aware about various aspects and methods that are used in forestry.

Students from classes 6th to 8th became the integral part of this trip and witnessed no: of sectors namely Medicinal Plant Garden, Insectry, Museum, Genetics Division etc. along with their guiding teachers. The purpose of this visit was to highlight the main cause of forest depletion and how they can be conserved for our future use. They were also made aware about the medicinal plantation and its use in our daily life. Students were shown nurseries and the various methods and technologies through which these forests are arranged and developed. These students came across the effects of Global warming on forest and natural vegetation and human activities that are causing degradation in natural habitat. Students of all the groups revealed their interest and enthusiasm by raising en no: of questions and queries related to forest development, conservation and protection.

In the same sequence they also thanked and expressed their heartfelt gratitude to the school principal Dr. Rajesh Kumar Chandel who had guided and was the inspirational role model in organizing this educational trip. School principal and GGIS management expressed thanks to the institute and the team of TFRI for guiding their students in such an effective manner and showed concern in enhancing their knowledge.
