

ECO-CLUB ACTIVITY

Keeping in view the hot weather and the increasing heat day by day. Gyan Ganga International School organized an activity for the students of Classes I to V under Eco-Club Activity on 13.04.2016. Under this Eco-Club Activity students of these classes were told to bring earthen pots and bowl that can be hanged and placed under tree shades, so that birds in this hot weather can easily get their feeds. These feeder's were arranged and hanged by the students themselves and were filled with food and cold water.

The main & foremost aim of conducting such an activity was to make this tiny ones aware about the conservation of the natural resources and species. They were also inculcated with moral values and thoughts of being human and share the quality of preserving their surroundings. These students who participated in the activity took an oath of keeping their environment balanced by planting trees and providing food and water to animals and birds.

The activity was conducted under the great guidance of school Principal Dr. Rajesh Kumar Chandel. He highlighted the importance of such activities and developing the human qualities in the students while addressing these students.
