“SEMINAR AT GGIS ON LEARNING CREATIVE THINKING SCIENCE AND SCIENCE FICTION”

On 09/08/2016 Tuesday a seminar based on learning creative thinking, science and science fiction was organized at GGIS. The resource person for the same was Vaibhav Varun a physics student from Moscow. School principal Dr. Rajesh Kumar Chandel welcomed the resource person and introduced him to the students. The resource person explained the various concepts of Physics, Mathematics and Biology. He started the seminar with the video showing how an egg fertilizes and the liquid inside the egg changes into a chicken. He explained the complete process and also highlighted the purpose of conducting such an experiment. He quoted that the students who conducted the experiment were not satisfied with the years long explanation given to them by their teacher regarding the same.

In the same sequence he also emphasized the theories of great mathematician Shri Ramanujan and the theories of great scientist Sir Issac Newton. He shared his personal experience his meeting with Mr. Rakesh Sharma an cosmonaut the first Indian to land the space. Further in his presentation Mr. Vaibhav Varun urged the students to be curious about what you are learning and be creative and ask questions related to the matter you read and comes across everyday as curiosity is the mother of Inventions.

He shared his personal experience of being an sky diver and told the students about his book 'I am Universe'. The aim and foremost aim of conducting this seminar was to develop and enhance the learning power, interest and curiosity towards the subject they are studying.

In the end school principal thanked the resource person for sharing his valuable experience and giving time to introduce the young minds. He was honored by the token of love by the school principal.
