

Gyanties Interacted Socially with Old People at Old Age Home

On 08th December 2016 management of Gyan Ganga International School organized a social interaction education trip of Class-VI students to the – Old Age Home, Shastri Nagar, Tilwara Road, Near Medical College, Jabalpur taking it as a part of holistic development of their students.

The trip of was organized under the great guidance of school Principal Dr. Rajesh Kumar Chandel and the group of more than 50 students were accompanied by the teachers.

The main purpose of organizing this social interaction educational trip was to make the youth of our society aware about the feelings and conditions of old age parents who are left away by their children at Old Age Home. Students performed cultural presentation such as solo song, poems, speeches, group song and group dance to entertain these old grandparents and also distributed blankets & fruits to them. During their interaction session these old people shared their young age's experiences with the students and also listened to these young ones.

The main attraction of this trip was when the old grandparents became emotional on receiving so much love and care by these youngsters.

The Principal, Dr. Rajesh Kumar Chandel encouraged the students and congratulated them for being socially responsible citizens of the country. He motivated them to keep moving towards the goal of charity and helping the weaker sections of the society. He was also happy to see the transformation in his students when he heard that they were happy and proud of their parents and grandparents.

It was evident from the visit to the Old Age Home that students have built in a strong feeling of helping their old parents at home and also understood their importance in terms of building stronger bond with their parents and grandparents.

The GGIS students thanked their Principal Dr. Rajesh Kumar Chandel for giving them an opportunity to redefine their responsibilities as responsible citizens through this Educational Social Interaction trip.
