

'WASTE MANAGEMENT' ISA PROJECT ACTIVITY

On August 9th 2017 following the activities ahead another eye opener activities was conducted under the project work of BRITISH COUNCIL for ISA certification. The project under which the activity was conducted was WASTE MANAGEMAENT in INDIA and SWEADEN.

The activity was PowerPoint presentation based on the waste management .The team of more than 80 students and teachers prepared a ppt presentation in which students of GGIS were made aware about how waste management is done. Students were made familiar with the various forms of waste and how those waste material can be reused, recycled and reduced with usage of 3 R's The session was made more interesting and lively one by the presentation of videos and small documentary that highlighted the barriers difficulties and problems that is been faced by the government, people and concerned department in disposing and handling the waste management activities. The program Swach Bharat Abhiyan project was also highlighted by the team to make everyone aware about its importance and how much it has been successful. The following activity was organized under the great guidance of school Principal Dr. Rajesh Kumar Chandel. He appreciated the group of teachers who made the liveliest one and making the youth aware.
